6. Summary of Current Actions

1. Follow prescribed actions in "GSTRP CONTRACTOR GUIDANCE", for the designated OP-AREA.

7. CURRENT ORGANIZATION

8. Resources Summary

[illegible]

RESPONSE OBJECTIVES	1. Incident Name	2. Date Prepared 01/24/2000	3. Time Prepared 14 26
4. Operational Period (Date/Time): <input type="text"/>			
5. Overall Incident Objective(s): 1. Protect the safety of life and health for response personnel and the surrounding communities. 2. Protect the safety of the Port. 3. Minimize/mitigate impact of spill on the environment. 4. Clean up spill affected areas to acceptable standards. 5. Rehabilitate wildlife and natural resources. 6. Return Port and waterways to normal operations. 7. Assess damage to natural resources.			
6. Objectives for specified Operational Period: 1. Provide for / secure the safety of the port. 2. Control and contain the source. 3. Protect Environmentally Sensitive Areas. 4. Fully ascertain scope and extent of spill. 5. Fully ascertain intents of RP on their role in spill response and mitigation; limits of liability and financial responsibilities. 6. Establish Unified Command and a functional command post. 7. Initiate spilled product recovery. 8. Provide information on situation to include extent of spill and actions being taken to interested parties and news media.			
7. Safety Message for specified Operational Period: 1. Personnel safety is a priority. 2. Review Site Safety Plan. 3. Always use required PPE. in accordance with Site Safety Plan. 4. Direct all safety questions to the Safety Officer. 5. Beware of alligators, snakes and insects native to the estuarine environment. 6. Report to the Safety Officer, any discrepancies or deviations from the Site Safety Plan. 7. Take necessary steps to protect the safety of the Public and Port Waterways.			
8. Weather: See Attached Weather Sheet			
9. Tides / Currents: See Attached Tide / Current Data			
10. Sunrise: _____ Sunset: _____

Alabama Geographic Specific Tactical Response Plan

Command Duty Officer Checklist

CDO/ICS Checklist

OVERALL RESPONSE GOALS:

Task	Completed
1. Protect the safety of life and health for response personnel and the surrounding communities.	
2. Protect the safety of the port.	
3. Minimize/mitigate impact of spill on the environment.	
4. Clean up spill affected areas to acceptable standards.	
5. Rehabilitate wildlife and natural resources.	
6. Return Port and waterways to normal operations.	
7. Assess damage to natural resources.	

RESPONSE OBJECTIVES & PRIORITIES - INITIAL OPERATIONAL PERIOD [IN- 0 TO IN+24]

Task	Completed
1. Provide for / secure the safety of the Port.	
2. Control / contain the source.	
3. Protect Environmentally Sensitive Areas.	
4. Fully ascertain scope and extent of spill.	
5. Fully ascertain intents of RP on their role in spill response and mitigation; limits of liability and financial responsibilities.	
6. Establish Unified command and a functional command post.	
7. Initiate spilled product recovery.	
8. Provide information on situation to include extent of spill and actions being taken to interested parties and news media.	

IMMEDIATE ISSUES & PRIORITIES [IN-0 TO IN+2]

Action Person: **CDO (IC/OPS)**

Task	Completed
1. Take steps necessary to protect the Safety of Public and Port and waterways.	
2. Establish communications with Responsible Party (ies).	
3. Call in designated initial response personnel.	
4. Dispatch persons to scene (safety considerations).	

CDO/ICS Checklist (cont.)

IMMEDIATE ISSUES & PRIORITIES [IN-0 TO IN+2]

*Action Person: **CDO (IC/OPS)** (Cont.)*

Task	Completed
5. Establish Situation Unit and gather information for accurate site picture.	
6. Establish Liaison Officer position.	
7. Establish Information Officer (IO) position.	
8. Determine use/non-use of <i>dispersants/in-situ burning</i> .	
9. Evaluate/Initiate actions to control and contain source.	
10. Evaluate/Initiate protective booming needs and strategies as per GSTRP.	
11. Determine needs for traditional Investigations/Inspections Department action in situation.	
12. Establish documentation/admin support position.	
13. Recall/establish Operations Section (as needed).	
14. Recall/establish Planning Section (as/if needed).	
15. Recall Safety Officer.	
16. Collect Contractor's report at IN+6, as per GSTRP's Contractors Guidance.	
17. Prepare for Initial Brief of Incident and actions taken (Ops strategy & Tactics) at IN+4.	

IMMEDIATE ISSUES & PRIORITIES [IN+0 TO IN+4]

A) *Action Person: **Liaison Person** [TO IN+4]*

In addition to duties described in the FOG, accomplish the following:

Task	Completed
1. Complete notifications.	
2. Fully ascertain intents of RP on their role in spill response and mitigation, limits of liability and financial responsibilities.	
3. Liaison with responsible party toward establishment and staffing of Unified Command Post.	
4. Coordinate participation of other agencies in spill response.	
5. Assess need for additional staffing.	
6. Document actions & conversations.	
7. Be ready to brief IC at IN+4.	

CDO/ICS Checklist (cont.)

IMMEDIATE ISSUES & PRIORITIES [IN+0 TO IN+4] (cont.)

B) Action Person: *Situation Unit Leader* [TO IN+4]

In addition to duties described in the FOG, accomplish the following:

Task	Completed
1. Fully ascertain scope and extent of spill; ensure accurate and up to date site picture for IC brief at IN+4.	
2. Provide information to IO for press release anticipated at IN+5.	
3. Evaluate need for additional support personnel.	

C) Action Person: *Information Officer* [TO IN+4]

In addition to duties described in the FOG, accomplish the following:

Task	Completed
1. Establish liaison with Responsible Parties IO and work out details for establishing JIC.	
2. Establish liaison with local news media and prepare initial press release at IN+5.	
3. Evaluate need for additional resources from D8 (pao) and PIAT.	
4. Work on setting up schedule and means for press releases, news conferences and press availability.	

D) Action Person: *OPS* [TO IN+4]

In addition to duties described in the FOG, accomplish the following:

Task	Completed
1. Monitor and evaluate RP spill mitigation actions.	
2. Coordinate deployment of response resources with RP. If no RP, then deploy necessary resources IAW GSTRP and Response Objectives priorities.	
3. Obtain aircraft assets.	
4. Ascertain need for additional resources and personnel.	
5. Be ready to brief IC at IN+4 on situational status and resources deployed.	
6. Collect Contractor's report at IN+6, as per GSTRP's Contractors Guidance.	
7. Provide information to IO for press release.	
8. Track resources initiated and deployed.	
9. Initiate organization of Section commensurate with extent and severity of spill and as per GSTRP.

Alabama Geographic Specific Tactical Response Plan

Shoreline Recovery (Contractor Guidance)

**CONTRACTOR GUIDANCE
GSTRP – MOBILE BAY
OPERATIONAL AREA (OP-AREA) 2 SE**

Shoreline/Resource Protection

OP-AREA 2SE:

Cypress Point (30° 19.82N – 087° 48.49W) south to the mouth of the Three Rivers (30° 14.77N – 087° 54.68W) north to (30° 19.18N – 087° 54.71W) and east to Cypress Point.

See the attached maps for locations and directions for Staging Areas, Access and Collection Points.

Staging Areas	Access Points	Collection Points
Billy's Seafood, Bon Secour River	Billy's Seafood, Bon Secour River	Billy's Seafood, Bon Secour River
Pines Public Boat Access	Pines Public Boat Access	Pines Public Boat Access
FT Morgan Marina		

Recommended/Required Resources:

<i>Boom</i>	<i>Work Boats</i>	<i>Vac Truck w/ Skimmer</i>	<i>Additional Equipment</i>
2400FT X 18"	4	2	Water Skimmer with a maximum of 5FT draft
			Oil Bladder
			Shallow water barge

Response Instructions:

All response activities are prioritized in accordance w/ the 4 prioritized areas for this OP-AREA and is listed on the form ICS 232. In the event that all areas can not be protected, then identify which areas are susceptible in relation to the oil spill trajectory.

Report to MSO any deviation from this operational plan.

For open water removal, see the section titled "On Water Removal For Mobile Bay."

MSO POC:_____ **Phone:**_____ **Other:**_____

1. Arrive with pre-designated equipment at staging area. Begin communication schedule with MSO Mobile as per the form ICS 205.
2. Set-up staging area and begin equipment deployment. Report to MSO when on start of equipment deployment and update every two hours.

A. Accomplish the tasks checked below:

	Task
	1. Deploy 1200FT of 18” boom from the marsh area just west of the entrance to the Bon Secour River to land just north of Sailboat Bay Condos. This blocks the entrance to Bon Secour. <i>(This will protect the environmentally sensitive area that is outlined in the Division Description.)</i>
	2. Deploy 400FT of 18” boom to block all bayou entrances along the shoreline from the Bon Secour River to Cypress Point. <i>(This will protect the environmentally sensitive area that is outlined in the Division Description.)</i>
	3. Deploy 400FT of 18” boom to block the entrance to Gasque Bayou at Ft Morgan. <i>(This will protect the environmentally sensitive area that is outlined in the Division Description.)</i>
	4. Deploy boom to block the entrance to Ewing Bayou. <i>(This will protect the environmentally sensitive area that is outlined in the Division Description.)</i>
	5. Remove collected oil from Billy’ Seafood Bon Secour River.
	6. Remove collected oil from Pines Public Boat Access.

Report any equipment failures/delays or difficulties deploying equipment, as required by this plan, to the MSO.

3. Provide the following information every six hours:

- Staging areas used
- Equipment in Staging
- Equipment on order w/ETA
- Equipment Deployed
- Personnel Deployed
- Oil Encountered
- Oil Recovered
- Estimated Efficiency
- Problems Encountered
- Logistics Support Necessary

- 4.** Complete daily Equipment and Resource summaries as provided, return by 2000 each 24 hour period to _____ located at _____.
- 5.** Report to MSO upon equipment removal and site departure.

Alabama Geographic Specific Tactical Response Plan

On-Water Removal (Contractor Guidance)

On Water Removal For Mobile Bay

LIMITATIONS: Water Depth 2 – 3 feet, further limitation with prolonged North Winds

See the "Contractor Guidance" for specific guidance on Staging Areas and Access Points for the "OP-AREA" in concern.

Recommended/Required Resources:

Skimmer: Draft Restriction to 3 Ft (less at low tide and in conditions of prolonged North Wind)
Calculate skimming capacity necessary using *NOAA Spill Tools Mechanical Skimmer Selection*

Boom: As needed to support operations

Work Boats: As needed to support operations

Additional Equipment: Shallow Water Skimmers with a maximum of 3 - 5FT draft

Shallow water barge with a maximum of 5FT draft

Oil Bladders

Helicopter/Aircraft/Boats (for spotting and directing skimmer operations)

Skimmer Collection Barge Locations:

1. Alabama State Docks (Mooring) Location: _____
2. Coast Guard Ship Fire & Test site, Sand Island (Mooring)
3. Navy Homeport (Mooring) Theodore Ship Channel
4. Explosive Anchorage Grounds north of FT Morgan (Anchorage) LAT/LON _____
5. Other: _____

Response Instructions:

Report to MSO any deviations from this operational plan.

MSO POC: _____ **Phone:** _____ **Other:** _____

Aircraft POC: _____ **Contact via:** _____

1. Arrive with equipment at staging areas. Initiate communication schedule with MSO Mobile as per the form ICS 205.
2. Set-up staging area and begin equipment deployment. Report to MSO when on arrival and start of equipment deployment and verbally update on progress every two hours.

A. On-Water Skimming Group:

	Task
	1. Become familiar with and brief workers on Site Safety Plan
	2. Skim oil as directed by Spotter
	3. Open water less than 5FT should use skimmer with oil bladder or shallow water barges.
	4. Offload collected oil at the following locations; 1. Alabama State Docks (Mooring) Location: _____ 2. Coast Guard Ship Fire & Test site, Sand Island (Mooring) 3. Navy Homeport (Mooring) Theodore Ship Channel 4. Explosive Anchorage Grounds north of FT Morgan (Anchorage) LAT/LON 5. Other: _____

Report any equipment failures/delays or difficulties deploying equipment, as required by this plan, to the MSO.

3. Provide the following information every 6 hours:

- Staging Areas used
- Equipment in Staging
- Equipment on order w/ETA
- Equipment Deployed
- Personnel deployed
- Oil Encountered
- Oil Recovered
- Estimated Efficiency
- Problems Encountered
- Logistic Support Necessary

4. Complete daily Equipment and Resource summaries as provided, return by 2000 each

24 hour period to _____ located at _____.

5. Report to MSO upon equipment removal and site departure.

Alabama Geographic Specific Tactical Response Plan

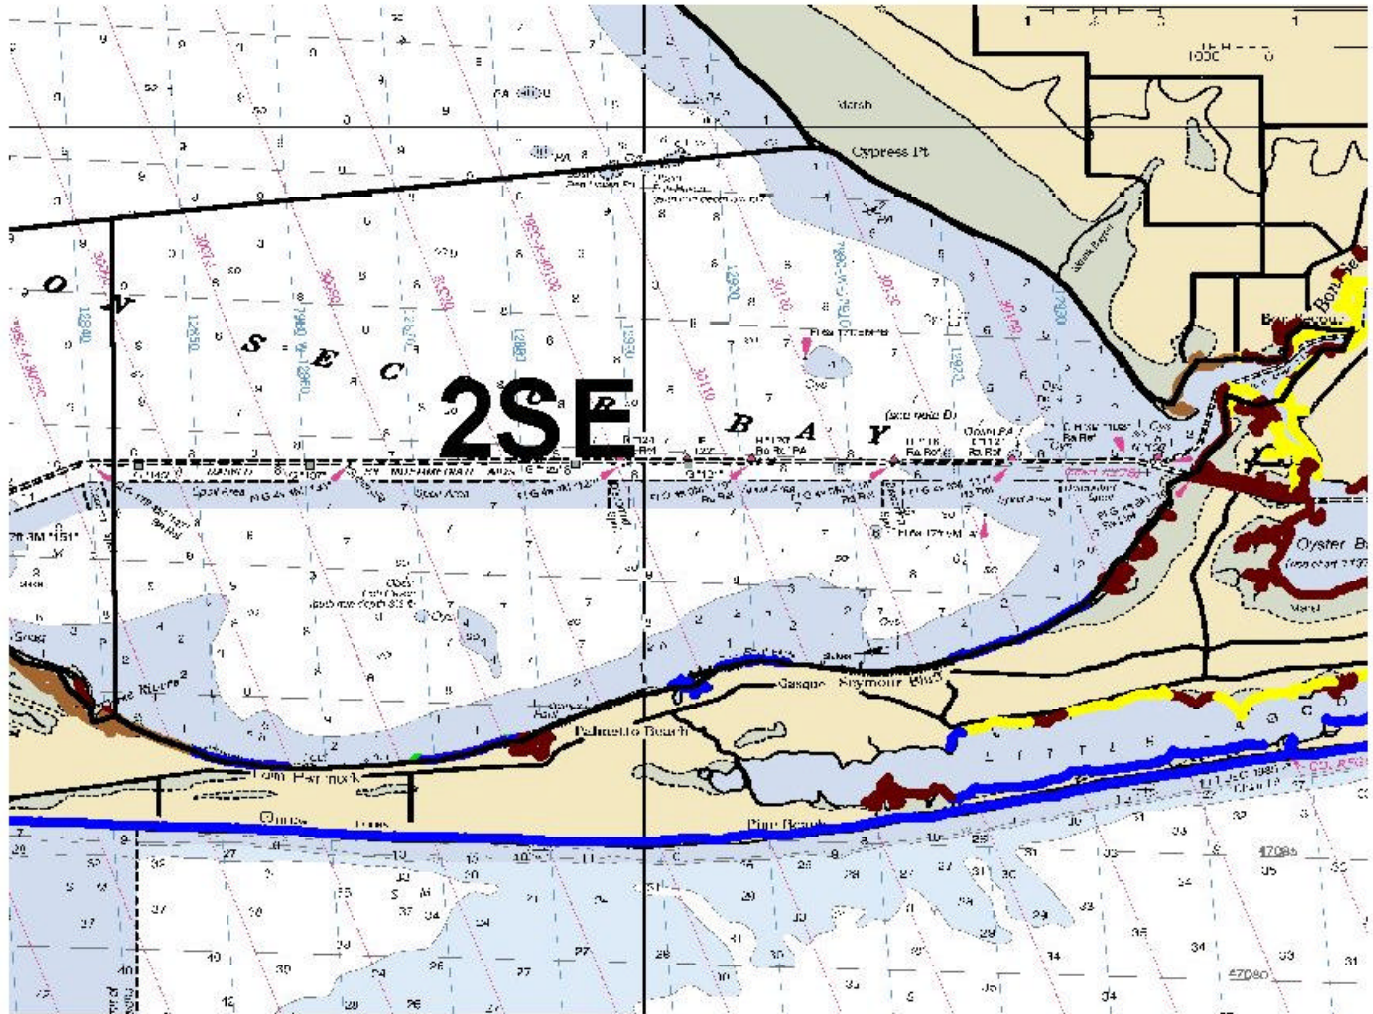

Environmental Prioritization/ Description

Prioritized Sensitive Areas for Mobile Bay

Galliard Island, in 1NW, has been identified as a Rookery for Pelicans. Although not yet prioritized, every effort should be made to protect it.

RANKING	AREA	ESI DIVISION	PROPOSED RANKING
1	MS Sound (Keep Out Of)	(1SW)	
2	Mouth of Weeks Bay	(1SE)	
3	St Andrews Bay to Three Rivers	(3SE)	
4	Old Fowl River (Includes Mouth of River)	(3SW)	
5	Little Dauphin Island	(1SW)	
6	Bridge North of Cedar Point	(2SW)	
7	Delta South of Hwy 90	(1NE)	
8	Dog River	(2NW)	
9	Marsh Area South of GICW to Bon Secour River	(2SE)	
10	Deer River (South Marsh)	(1NW)	
11	Deer River Point North to Middle Bay Port	(1NW)	
12	Bon Secour River to Weeks Bay: Wetland Inlets	(2SE)	
13	USA/Brookley Marsh	(2NW)	
14	Austin Bayou	(3SW)	
15	Gasque Bayou	(2SE)	
16	Garrows Bend	(2NW)	
17	Delchamps Bayou	(3SW)	
18	Entrance of Grand Bay	(1NE)	
19	Ewing Bayou	(2SE)	
20	Weeks Bay South to Cypress Point: Wetland Inlets	(1SE)	
21	Fairhope to Orange Street Public Beach	(2NE)	
22	Village Point	(2NE)	
23	Mullet Park/Marianne Beach	(1SE)	
24	Theodore Canal	(1NE)	
25	Baileys Creek	(3NE)	
26	Mayday Park: Daphne	(2NE)	
27	Port of Mobile	(1N & 1NE)	
28	Sand Island	(1NE)	
29	Grand Hotel	(3NE)	
30	Grand Hotel Basin	(2NE)	
31	Lake Forest Yacht Club	(1N & 1NE)	
32	Subdivision w/ Canal	(1SE)

DIVISION: 2 SE

Description:

Cypress Point (30° 19.82 – 087° 48.49) south then southwest to Mouth of Three Rivers (30° 14.77 N – 087° 54.68 W) north to (30° 19.18, 087° 54.71) and east to Cypress Point.

Total Area: 47 sq miles

Prioritized Areas:

1. Marsh Area South GICW to Bon Secour River
2. Bon Secour River to Weeks Bay: Wetland Inlets
3. Gasque Bayou
4. Ewing Bayou

Overall Area Prioritization:

(9)

(12)

(15)

(19)

Biological: (S=State, F=Federal)

Endangered Species: Eastern Indigo Snake (S), American Alligator (F)

Threatened Species: Black Pine Snake (S), Eastern Indigo Snake (F), Southern Hognose Snake (S), Florida Pine Snake (S), Gopher Tortoise (S)

Species of Special Concern: Osprey (S&F), Reddish Egret (S&F), Flatwood Salamander (S), Crystal Darter (S), Rafinesque's Big-eared Bat (S), Southeastern Bat (S), Gulf Salt Marsh Snake (S), Southeastern Pocket Gopher (S), American Alligator (S)

Limited Abundance of Vegetative Species: None

Habitat: Salt Water and Brackish Marshes, Fine Grained Sand Beaches, Submerged Aquatic Vegetation

Mating/ Nesting/ Nursery Area: Weeks Bay, Coastal Area for Weeks Bay

Nesting Species: (Months of the Year)

Black Tern	04-08	Black-Crowned Night Heron	03-07
Caspian Tern	04-08	Cattle Egret	06-09
Clapper Rail	05-08	Great Blue Heron	02-05
Great Egret	03-05	King Rail	05-08
Least Bittern	04-08	Little Blue Heron	03-07
Laughing Gull	04-08	Royal Tern	04-08
Snowy Egret	03-07	White Ibis	04-07
Willet	05-08	Yellow-Crowned Night Heron	03-07
Tricolored Heron	03-07		

Spawning Species: (Months of the Year)

American Oyster 04-11

Larvae/Juvenile Species: (Months of the Year)

American Oyster	04-11	Brown Shrimp	03-04
White Shrimp	06-09		

Ecological: (Months of the Year)

Interruption of Mating Season/ Behavior: High probability during 02-08.

Interruption of Nesting Season/ Behavior: High probability during 03-09.

Chemical:

Dissolved Oxygen: Good to moderate dissolved oxygen concentrations.

Biological Oxygen Demand (BOD): No notable concerns.

Chemical Oxygen Demand (COD): No notable concerns.

Eutrophication: Moderate nutrient concentrations.

Benthic Index: Moderate w/ mostly degraded benthic conditions.

Sediment Contamination: Low probability of ecological toxicity due to enriched sediment.

Physical:

Water Circulation: Moderate

Water Flushing: Moderate

Wave Exposure: Moderate

Archaeo-Cultural:

Archeological Sites: Yes: *Contact Thomas Maher 334-242-3184 X245 (State Archaeologist)*

Historical Sites: None

Cultural Sites: None

Areas of Preservation and Restoration (APR): Bon Secour National Wildlife Refuge (proposed)

Socio-Economic:

Estuarine Research Reserve: Coastal Area for Weeks Bay

Federal/State Management Area: Bon Secour National Wildlife Refuge, Coastal Area for Weeks Bay

Geographic Areas of Particular Concern (GAPC): Coastal Area for Weeks Bay (Proposed)

Gulf Ecological Management Sites (GEMS): Bon Secour National Wildlife Refuge

Recreational Importance: Bon Secour Bay, Bon Secour River, and Bon Secour Fisheries

Economic Importance: Bon Secour River, GICW, Fishing Vsls docking in Bon Secour River

Fish of Recreational/Economic Importance: (Months of the Year)

Atlantic Croaker	03-11	Florida Pompano	06-07
Gulf Flounder	03-10	Sand Sea trout	06-12
Southern Flounder	06, 12	Spotted Sea trout	09
Striped Mullet	01-10	White Mullet	08-12

Shellfish of Recreational/Economic Importance: (Months of the Year)

American Oyster	01-12	Brown Shrimp	01-12
Blue Crab	01-12	Pink Shrimp	01-12
White Shrimp	01-12		

****American Oyster Reefs- Private and owned by Bon Secour Fisheries - near surface**

Local Industry:

Alabama Geographic Specific Tactical Response Plan

Dispersant Checklist

Dispersant Use Decision /Implementation

Element Checklist

Note: Need all “yes” answers before dispersant use is acceptable.

Decision Element

<u>Yes</u>	<u>No</u>	<p>1. Is the spill/oil dispersable?</p> <p>Oil is generally dispersable if: API Gravity is more than 17 Pour Point is less than 10 F (5.5 C) below Ambient temperature. Viscosity is less than 10,000 centistokes.</p> <p>Note: Some modern dispersants may be formulated to be effective on a wider range of oil properties. The choices of dispersants listed on the NCP's National Product Schedule are limited. To answer this question you should look at which dispersant would be the most effective given the type of oil.</p>
<u>Yes</u>	<u>No</u>	<p>2. Have environmental tradeoffs of dispersant use indicated that use should be considered.</p> <p>Note: This is one of the most difficult questions. Dispersant toxicity assessment information found in Appendix V of the RRT pre-approval agreement may assist in this decision.</p>
<u>Yes</u>	<u>No</u>	<p>3. Is the chosen dispersant likely to be effective?</p> <p>Consider:</p> <ul style="list-style-type: none"> • Effectiveness of dispersant application to the oil; • Dispersant-to-oil application ratio; • Oil slick thickness; • Distribution of oil slick on the water; • Droplet size distribution in aerial spray; • Oil viscosity; • Energy input; • Suspended particles in water (Sedimentation); • Weathering of oil; • Emulsification of oil; • Oil composition; • Dispersant composition; • Water salinity; • Temperature; • Dispersant type compatible with application means. <p>Note: A preliminary effectiveness test such as the standard flask swirling method is highly recommended.</p>

Dispersant Use Decision /Implementation

Element Checklist

Note: Need all “yes” answers before dispersant use is acceptable.

Decision Element

<u>Yes</u>	<u>No</u>	<p>4. Can dispersant application be conducted safely and effectively given the physical environments?</p> <p>Environmental parameters:</p> <ul style="list-style-type: none">*winds less than or equal to 25 knots;*visibility greater than or equal to 3 miles;*ceiling greater than or equal to 1000 feet;*operations during daylight hours only
<u>Yes</u>	<u>No</u>	<p>5. Are sufficient equipment and personnel available to conduct aerial dispersant application operations within the window of opportunity?</p> <p>Note: Refer to elements and position descriptions under the Dispersant Operations Group Supervisor in the Operations Section...Other tools are available to assess this such as the NOAA Dispersant Mission Planner.</p>
<u>Yes</u>	<u>No</u>	<p>6. Has a Site Safety Plan for dispersant operations been completed?</p>
<u>Yes</u>	<u>No</u>	<p>7. Is the spill/oil to be dispersed within a Pre-Approved Zone?</p> <p>Refer to section II within the RRT Dispersant Pre-Approval Agreement If the spill/oil is NOT in a Pre-Approved Zone, has approval been granted?</p> <p>Submit “RRT Documentation/Application Form for Dispersant Use” to the Incident Specific RRT members with request for approval</p> <p>Dispersant use in non-approved areas must be requested by the OCS and approved by EPA and the affected state(s) after consultation with DOC and DOI.</p>

Dispersant Use Decision /Implementation

Element Checklist

Note: Need all “yes” answers before dispersant use is acceptable.

Decision Element

<u>Yes</u>	<u>No</u>	<p>8. Are the necessary equipment and trained personnel available to conduct the recommended monitoring operations?</p> <p>The recommended monitoring protocol in the RRT Region IV is the Special Monitoring for Advanced Response Technologies or SMART. The Gulf Strike Team or Atlantic Strike Team is available to support and provide monitoring assistance.</p> <p>It may not be appropriate to base Go/No Go or continue/discontinue decisions solely on results from the SMART monitoring team since dispersant effectiveness is often delayed or not totally and easily conclusive.</p> <p>Monitoring is recommended but not strictly required...should not be a showstopper for operation.</p>
<u>Yes</u>	<u>No</u>	<p>9. Has the overflight to assure that endangered species are not in the application area been conducted?</p> <p>The provisions of the Section 7 consultation in regard to the RRT Pre-Approval Agreement requires an overflight of the application area to ensure endangered species are not threatened or endangered by the Operation.</p>
<u>Yes</u>	<u>No</u>	<p>10. Has a Dispersant Operations Plan been completed?</p> <p>Attached within this plan is a Dispersant Operations Plan template. The completion of this template should provide the OSC and Unified Command with a suitable and complete plan to support and implement the dispersant effort.</p>
